Ishan Maheshwari

Software Engineer
ishan.maheshwari2024@nst.rishihood.edu.in | 9058904238 | Meerut, Uttar Pradesh
Linkedin | **Portfolio** | **GitHub** | **LeetCode**

Education

Rishihood University — Sonipat, Haryana
Computer Science Bachelors — August 2024 - May 2028
CGPA: 8.6

Experience

DegreeBaba | **Software Development Intern** — Pune, India (Remote) | June 2026 - Present

- **Lead end-to-end engineering** of the company's core technology products, architecting, developing, testing, deploying, and maintaining AI-powered platforms across frontend, backend, databases, cloud infrastructure, and automation.
- Built an AI-powered content publishing platform featuring automated document ingestion, intelligent validation, and publishing workflows, **reducing** content processing costs by **60%** while significantly improving operational efficiency.
- **Lead** the development of a cross-platform **CRM system (Web & Mobile)** to streamline internal operations and establish the foundation for future SaaS offerings.
- Collaborate directly with founders on product strategy, system architecture, and technical roadmaps, driving engineering decisions from concept through production.

Youtube | **Content Creator (@IshanDecodes)** — Remote | June 2026 - Present

- Produce research-driven long-form videos on business strategy, technology, AI, sports, and branding.
- Conduct in-depth market research and competitive analysis from multiple credible sources.
- Simplify complex business and technical concepts through data-driven storytelling.
- Perform end-to-end video production, including scripting, editing, thumbnail planning, and publishing.

Skills

Programming Languages:	Python, SQL, JavaScript, TypeScript
Libraries/Frameworks:	React, NumPy, Pandas, Matplotlib, TensorFlow, Next.js, Express.js
Tools / Platforms:	Git and GitHub, Postman, Prisma ORM, OAuth 2.0, Tableau
Databases:	MongoDB, MySQL, PostgreSQL, Redis, SQLite

Projects / Open-Source

NextFlow | **Link** — *Next, TypeScript, React Flow, Node.js, Prisma ORM, PostgreSQL (Neon)*

- Engineered a **visual drag-and-drop workflow builder** using React Flow for creating and executing AI-powered automation pipelines.
- Designed **asynchronous workflow execution** with Trigger.dev, supporting real-time execution tracking and scalable background processing.
- Built **AI-powered media processing nodes** for image generation, image editing, video frame extraction, and AI-based video upscaling.
- Implemented **text-to-workflow generation**, allowing users to describe automation in natural language and automatically generate executable workflow graphs using LLMs.

Honors & Awards

- Maintaining 590+ days streak on LeetCode
- Finalist, University Sports Fest Cricket Tournament
- Project shortlisted in the internal Smart India Hackathon (SIH) campus selection round.
